*“Our best
today will only
become better
tomorrow.”*

**Over the years,
we have done,
only one thing,
very
diligently!**

**We have worked
very patiently
to strengthen
our business
model
by making small
yet meaningful
changes
which
individually
mean nothing.**

**But when
cumulated together,
these seemingly
insignificant tweaks
have made us immensely
STRONG,
and promise to make
us significantly
STRONGER.**

We widened our footprint.

We adopted the differentiated approach. Most spinners invested in spinning standard yarn. Some of them subsequently graduate to mélange yarn. We focused on being the largest and best in mélange yarns, and subsequently graduated even higher, into speciality and sustainable yarns.

We widened our footprint.

For sustaining our growth, we went beyond the domestic boundaries. It de-risked us from an over-dependence on a particular market and widened our opportunity funnel. We silently increased our footprint in the global market. As a result, the proportion of export income in our revenue basket increased from 37% in FY18 to 63% in FY22.

We toiled for customisation.

We complemented our ambition with a novel approach - 'sell-then-make'. It showcased that we have a deep-rooted ability to customise products as per our client's needs. This minor tweak in our approach increased the share of customised products in our sales mix. It also helped in gaining the attention of global players.

We improved our service levels.

We did not just make great yarn. We added a touch of superior service to that. That became our stand-out feature in an otherwise cluttered market space. Case in point: we delivered mélange yarn (value-added yarns) considerably faster than others. Our client base expanded.

We neatly wove in sustainability.

We read the writing on the global landscape – SUSTAINABLE. We accessed a wide range of sustainable fibres blended with cotton to manufacture environment-friendly yarns. This allowed us to reduce our customer's carbon footprint and ours. Currently, we service several globally-reputed brands.

Chairman's desk*

“The global respect for our ability to deliver quality products on time and to customise products as per the evolving and demanding needs of marquee customers positions us perfectly to ride the opportunity wave.”

Dear shareholders,

I take this opportunity to address you at a time, which I would reckon as the best and the worst.

It was a terrible start as the second wave of the pandemic tested our grit and determination to survive. Despite the losses, resilient India rebounded in style. Business activity across sectors surged almost suddenly. So, it was with the textile sector.

The ‘China-Plus-One’ policy adopted by the Western World created an unprecedented opportunity for textile hubs across the world. As large western textile brands focused on broadening their vendor base with reliable partners, Indian textile players across the textile value chain saw their shopfloors abuzz with activity and their order book swell. The experience at Winsome was quite the same.

In the time that followed, we did far better than we had ever done in our journey this far. And even when the world faced chaos and disruption in phases, we grabbed every opportunity to report the best numbers ever. Our revenue from operations grew by 53.08% over the previous year, EBITDA increased by 140.37% as did the Net Profit which jumped by 3847.75%. We prudently deployed the resultant liquidity in deleveraging the organisation. As such our debt-equity ratio improved to 1.32x in FY22 (2.90x in FY21) and our interest cover scaled to 3.30x in FY22 (1.81x in FY21). The bottomline then is that we made Winsome strong.

There would be a lingering question in the minds of readers... was this a flash in the pan, or will the good times last? From the way things appear, this does not seem to be a one-time opportunity. The Plus-One strategy, in our opinion, appears to be a paradigm shift that has only started playing out.

When global textile labels are partnering with textile manufacturers, it is generally for the long-term as their vendor approval process consumes significant time and resource utilisation, with the possibility of a revenue impact. Quite a few of them have already widened their supplier base with many more to follow suit. This has only broadened the opportunity horizon for other textile hubs such as Bangladesh, Vietnam, Pakistan, Sri Lanka and India, resulting in an exceptional flurry of capacity building in these nations to effectively cater to the rise in volumes.

Additionally, the spiraling Sri Lanka crisis has the potential to disbalance the global textile equation as the island nation is a significant player in the global textile market. This augurs well for India as

Indian companies can strengthen their global presence by filling in the vacuum.

The Indian Government on its part is doing its bit for uplifting India in global trade. It has entered into Free Trade Agreements (FTA) with the UAE and Australia. Moreover, it is actively discussing the prospects of FTAs with the European Union, Canada and the UK. These agreements will be "big-ticket" deals for the textiles sector with the potential to level the playing field for the Indian industry vis-à-vis competitors such as Bangladesh, Sri Lanka and Vietnam. It would have positive ramifications on the Indian textile industry over the medium term.

The other visible positive that has transpired in the wake of the pandemic is the sudden surge in loungewear owing to the transformation in the work culture. Demand for knitted garments has increased considerably. From the likes of it, this trend is expected to continue for some time now as the working world is becoming increasingly flexible to working from anywhere, not necessarily a proper office. Several global brands have set up a base in India for sourcing knitted garments for their global operations.

This trend holds considerable promise for Winsome being one of the leading players in India in cotton, mélange and blended yarns that are widely used in knitted garments.

Our global respect for our ability to deliver quality products on time and to customise products as per the evolving and demanding needs of marquee customers positions us perfectly to ride the opportunity wave.

We plan to upgrade our machinery in our mélange unit which will increase our flexibility to produce more 100% cotton mélange yarn

As India's textile sector prepares to move a fast foot forward to move higher in the global space, I continue to be in an optimistic mood.

Cotton prices have soared to unprecedented levels owing to lower domestic cotton production, higher demand and increasing international prices. But this sharp spike has rendered business unviable for many small and medium textile players due to reduced margins and higher blockage of working capital – leading to demand destruction in the domestic and international markets.

Industry watchers are of the opinion that an operational recovery is expected by the second half of FY23 on the back of a likely correction in cotton prices with the arrival of the new cotton season in October 2022 wherein cotton production could be higher than in the current season. The bottomline is that until the cotton prices correct to more sustainable levels, FY23 appears to be a challenging year for the entire textile value chain.

In closing, I, on behalf of the Board, would like to thank our esteemed shareholders, partners and other stakeholders for believing in our story and reposing their confidence in our capability and extending their support in our long journey of perseverance.

We stand firm in our commitment to building a stronger business and delivering value to all our stakeholders.

Ashish Bagrodia

The **Yarn vertical**

110,000

Spindles

Winsome has over the years progressively specialised in the manufacture and export of cotton and cotton blended mélangé yarn, speciality mélangé and dyed yarn, among other products.

The Company is a one-stop shop for all kinds of fiber-dyed yarns manufactured from natural or man-made fibers across any blend and any shade in the count range of 8s – 60s. It is respected for its

customisation capability and product quality among discerning knitters and weavers in India and across the globe.

The Company spins the finest quality of 100% cotton mélangé yarn; it also blends various fibers like viscose, polyester, bamboo, modal, wool, nylon, etc. (carded and combed) which widen their downstream weaving and knitting applications.

30MT

*Yarn/Fiber dyeing
capacity*

The yarn is used in knitwear, socks, woven fabrics and home textiles. The Company's yarn is acknowledged as world-class, finding growing traction within India and abroad.

The Company continues to invest in modernising its operating assets and absorbing new technologies that enhance product development capabilities and man-machine productivity.

Where do we stand apart?

Range

We offer one of the widest ranges of melange and dyed yarns, one of the very few spinners in India who can boast of a product basket that comprises more than 1,000 varieties.

Value addition

We are one of India's most formidable players in the melange yarn and speciality melange yarns.

Capability

We manufacture every kind of complex yarn. We have developed Jasper Raw white in C/P 70/30, Denim Waste Melange, Polyester Vintage Melange, Florescent Melange Yarns, Biodegradable Recycled Polyester Melange, Eco Star Raw White yarn,

Sparkle Yarn, etc which are challenging products with distinctive properties.

Relationships

We practice a 'make to order' policy where production for a large percentage of our production is taken up only on receipt of confirmed orders. Our product customisation finesse has enabled us to forge and foster lasting relations with large textile players in India and across the globe.

FY22 in retrospect

It was an extraordinary period as the performance went past all previous best benchmarks. This was primarily due to the surge in demand for yarn owing to the global shift away from Chinese yarns. The resultant opportunities ensured that textile hubs across the world were flooded with demand.

Winsome's dominance in the melange yarn space added to its fortunes as the demand for knitted fabrics (loungewear) increased substantially owing to the lockdowns and the 'work from home' trend that played out across the globe in the wake of the pandemic. As a result, yarn production and sales stood at an all-time high level in FY22.

Even as the shopfloor remained abuzz with activity, the Company sharpened its focus on optimising costs by eliminating wastages and reducing the consumption of utilities. Shopfloor ideated suggestions

for operational improvements were reviewed closely – those that appeared promising were implemented.

Modernisation continued unabated as the Company replaced some of its legacy spindles with contemporary variants. Also, the team focused on debottlenecking its processes which facilitated a superior overall performance on the shop floor.

The Company continued to endorse contracts with customers in India and across the globe which resulted in a sizeable jump in sales volumes.

Modernisation initiatives in FY22

- Purchased New TFO (Two For One) VTS-10 Twisting machines with the latest technology resulting in energy saving and high productivity.

- Purchased New Cheese winding (PS Mettler PPW-A), with the latest technology to increase production.

- Purchased state-of-the-art Card machines LC361 with the latest technology having measures such as energy saving and high productivity to produce high value-added Melange yarn.

- Installed state of art Card Machines C72 from Rieter with the latest technology that provides energy saving and high productivity to produce high-value-added cotton/Melange yarn.

- Invested in TEXPART Spindle CS-1 on three Ring Frames each having 1200 spindles to enhance power saving & getting better yarn quality.

*Environment, Safety and
Governance (ESG)*

Strengthening our commitment to the world around us

Winsome is committed to improving everyday life. In keeping with this mission, ESG is an inextricable part of its business. The Company's commitment to the environment and its people are showcased in the global ISO certification received – being the first in the region to secure this watermark. Having earned this repute, the ESG philosophy and practices are now a part of everything the team does every day.

Environment management

Winsome environment management practices are governed by its ambition of 'leaving a world a little better than how we found it'. This aspiration continues to drive the Company to streamline its business operations to eliminate wastages and optimise the consumption of finite resources.

Energy management: At Winsome, every business strategy and investment is with an eye to energy saving. New equipment purchased, has to clear the energy-saving filter, among other filters to be selected. Case in point: Installation of three 1200-spindle make texpart-CS1 in Ring Frames-in Shed-01 saved 12,232 KWH/per annum.

During the year, the Company continued its efforts to replace conventional

lighting with LEG variants across the plant and in the operating facility. This helped in optimising energy consumption. Also, about 20% of the Company's energy requirement is sourced from hydroelectric power – a clean power source.

The Company continued to utilise waste heat recovered in other operating processes which helped in reducing power consumption.

Water management: Experts suggest that water scarcity, in coming years could be so intense that it could lead to the Third World War. Understanding the criticality of finite useable water, the Company has invested in a state-of-the-art Effluent Treatment Plant (ETP), treated water is used in the operating process and gardening in the facility.

Material management: The Company reuses the cotton waste in yarn making thereby optimising raw cotton consumption. As a responsible manufacturer, the Company consumes dyes and chemicals that are free of AZO, NPEO, APEO phenyls and formaldehyde.

Paper usage: The transformation from manual office work to a completely digital working environment has helped reduce paper consumption.

Social relevance

Winsome believes that an island of prosperity cannot survive in an overall matrix of misery. The Company has made the neighbouring community a part of the Winsome family by sharing its concerns and implementing outreach efforts.

Employees: Winsome has taken people for managing its shopfloor operations from communities and villages around the periphery of its operating unit. It continues to train its people on functional and technical aspects which have enhanced their knowledge capital and hence their self-confidence. It also takes care of its people's safety and

health through training and medical coverage. The Company's efforts to take care of its people during the pandemic bear testimony to its care for its team.

Communities: Winsome engages with the community around its manufacturing locations, widening its circle of prosperity in line with the United Nations' Sustainable Development Goals. The key areas of intervention include

- Promoting Healthcare and Education including Technical and Special Education
- Promotion of sports & physical education activities

FY22, a snapshot

Governance

At Winsome, corporate governance is about putting in place systems that go beyond required standards. In keeping with this philosophy, the Company has created a robust governance model that facilitates it to realise far-reaching outcomes with a strong sense of purpose.

The Company embraces the best corporate governance practices to ensure transparency and contribute to the creation of long-term economic value and sustainable development. The team's passion and perseverance in sustaining the discipline of business integrity have earned its various accolades.

Value creation: Robust growth strategies and strong economic performance are the cornerstones for any organisation. So, it is with Winsome. Despite the challenging start to FY22, the Company was able to maintain steady momentum and created value for its key stakeholder categories.

The Governance framework: Integrity, transparency and openness

are the key pillars of Winsome's corporate governance edifice. It has established a corporate governance structure that works towards achieving sustainable growth in the medium and long term. The Company's multi-level sustainability governance structure provides a focused oversight over the Company's policies, initiatives, risks and sustainability matters. The Board of Directors is actively involved in the Company's business activities and ensures that the Company remains true to the ethos of our corporate governance.

Compliances: As a publicly traded company Winsome needs to meet all compliance requirements. For this, the Company maintains a strict adherence to all the compliances as laid down by the local and national governments and the regulators. These compliance requirements are supported by a robust internal control mechanism to ensure effective working and risk mitigation. It is the Board's responsibility to periodically review compliance reports that apply to Winsome along with a well-defined procedure to work on instances of non-compliance if any.

FY22, a snapshot

Managing business uncertainty

In a rapidly changing business environment with dynamic customer requirements, business risks are constantly evolving. At Winsome, we continuously monitor the internal and external environment to identify potential, emerging risks and their impact on our business. We evaluate risks that can impact our strategic, operational, financial and compliance objectives and implement adequate mitigation measures to minimise the adverse impact of risks on our business performance and prospects.

Growth concerns

Mitigation measure

Demand risk: Demand for yarn could taper down.

This would impact the entire yarn sector. Winsome stands out owing to its diversified product and geographic presence.

Competition risk: Intense competition could hamper business prospects.

Winsome stands out owing to its long and healthy business relations with Brands and customers, its demonstrated skill in spinning and its respect in the marketplace

Operations concerns

Mitigation measure

Material risk: Inadequate availability of materials could impact deliveries
 Winsome has widened its raw cotton supplier base in India and from across the globe. It also maintains adequate inventory to cater to emergencies.

Scale risk: Shortfall in capacity could impede growth
 Winsome continues to modernize its spindlage which enhances machine productivity.

Innovation risk: More multi-blended yarns are becoming the order of the day.
 Winsome is recognised in the textile space for its ability to develop multi-blended yarns. The company has a separate 'R&D and Innovations department' which is a recognised by the DSIR (Department of Scientific and Industrial Research, Delhi) and is continuously working on the development of new yarns, blends, special effects and colours.

Customer attrition risk: Losing customers to competition could hurt business performance and prospects.
 Winsome engages with its customers frequently to gain insights into issues faced by customers. The feedback forms the platform for improvements and customer satisfaction.

People attrition risk: People leaving the Company would result in a knowledge drain.
 Winsome's people-centric policies and practices, especially during the pandemic, continue to strengthen people's loyalty to the Company.

Environment risk: Non-compliance to regulatory norms and standards could impact business operations.
 Winsome continues to streamline its operations to ensure that it more than matches pollution control guidelines. It continues to make suitable investments, if required, to optimise its effluent discharge.

Financial concerns

Mitigation measure

Margin risk: Margins in the business are low.
 Winsome focuses on the value-added end of the yarn business

Raw material cost risk: Spike in cotton could impact profitability.
 It would impact the entire textile industry.

Currency risk: Adverse currency fluctuation could dent profitability.
 Winsome adopts a prudent policy of hedging its net foreign currency exposure at all times.

Leverage risk: High debt could impact its growth aspirations
 Winsome has invested in strategic business initiatives which have significantly augmented its capabilities and global positioning. These initiatives promise to considerably enhance the Company's cash flow going forward which will be deployed in deleveraging the organisation.

Management Discussion & Analysis

An economic review

Global economy: After a dismal performance in 2020, the global economy rebounded aggressively with the world GDP registering a 6.1% growth in 2021. The growth was contributed by most nations although the extent of growth was uneven between advanced economies and emerging economies. This difference was primarily on account of the large fiscal stimulus announced by Governments of advanced nations and the thrust on vaccination.

As per the estimates of the latest UNIDO World Manufacturing Report, production in developing and emerging industrial economies grew by 4.3%. Industrialised economies on the other hand have exceeded their pre-pandemic production level since the first quarter of 2021 and have shown a stable year-over-year growth of 3.2%.

As the recovery in global trade gained momentum from the first half of 2021

and continued in the second half of the year. It increased by about US\$ 200 billion to US\$ 5.8 trillion. Service trade increased by US\$ 50 billion to US\$ 1.6 trillion, slightly higher than pre-pandemic levels.

This resurgence has got tempered down owing to the Russia-Ukraine crisis which

has significantly fueled inflation across the board. This is expected to significantly affect vulnerable populations in low-income countries very hard. Global growth is projected to slow to 3.6% in 2022 and 2023.

Indian economy: Aligned to the global trend, India witnessed a sharp resurgence in economic activity and output. India's GDP rebounded from a negative growth of 6.6% in FY21 to positive growth of 8.7% in FY22.

Despite the second wave of the pandemic at the start of the fiscal, a determined India flattened the lethal pandemic curve with grit and determination. Thereafter, it was a one-way movement as commercial activity gained steam in all segments of the economy.

As per the Economic Survey, the uptick in the economy was led by 11.8% growth in the industrial sector and 8.2% growth in the services sector. The agriculture sector growth is seen at 3.9% in FY22.

The Centre beat all its estimates of revenue collection in FY22, aided by better indirect tax mop-up, strict compliance measures, and recovery in most sectors. India's gross revenue collection soared to a record high of ₹ 27.07 trillion in FY22, while the tax-to-

GDP ratio jumped to an over two-decade high of 11.7%. The total mop-up was 34% more than the ₹ 20.27 trillion collected in FY21. About 49% growth was registered in direct tax collection and 20% in indirect tax collection in FY22.

The economic resurgence was cut short owing to the geopolitical crisis which resulted in a huge spike in commodity prices, fuel prices, supply-chain disruption and logistical costs. In keeping with this reality, various agencies – external and government – have factored this negative and pared its estimated GDP growth for FY23 to about 7%-plus. This number, in reality though, will depend on the duration of the war and the outcome of debilitating sanctions that the western world has imposed on Russia – it will have its set of opportunities and challenges for India Inc. in FY23.

The sectoral space

Global Textile and Apparel: Increasing demand for apparel from the fashion industry coupled with the growth of e-commerce platforms is expected to drive the market growth over the forecast period. The industry works on three major principles, designing, producing, and distributing different flexible materials, such as yarn and clothing.

The textile and apparel industry has witnessed changes in the last few decades. Over the years, a major part of the industry has moved away from developed countries like the US, the EU and Japan to destinations like China, South Asia and South-East Asia. The two most vital variables which brought about this move were the availability of low-cost manpower and the abundance of raw materials in Asian countries. India, among the Asian countries, is one of the most competitive textiles and apparel manufacturing centers today.

The more recent trend: Covid-19 has triggered the redistribution of global trade shares and a recalibration of sourcing patterns ("China plus one" sourcing).

Before the pandemic, the global textile trade was dominated by China owing to its huge scale leading to cost competitiveness and duty-free access to large markets like the European Union (EU) and the US.

The pandemic has adversely impacted this position. Supply chain disruptions and travel restrictions to China were key factors in this dent. So the 'China-plus-one' strategy aims to cut down on an exclusive dependence on Chinese supply chains and do business with more countries.

China's market share in the \$1 trillion global textiles trade is estimated at between 30-36%. A 1% market share shift will imply a \$10-billion market opportunity. This shift is accelerating the

growth of other textile hubs across the world.

Over the horizon: The global textile market size was valued at USD 993.6 billion in 2021 and is anticipated to grow at a CAGR of 4.0% from 2022 to 2030.

As population growth and prosperity increase, so does the consumption of fibres across the globe. While this holds for all staple fibres, the use of man-made fibres such as cellulosic staple fibres and synthetic staple fibres is growing particularly quickly. The consumption of cellulosic staple fibres is expected to double to 10 million tons by 2030.

Additionally, there is a growing demand for online shopping which was further intensified by the pandemic and will continue to drive the global textile market. Furthermore, the market is expected to strengthen in light of the increasing demand for technical textiles due to the industrial sector's growth, technological advancements, and increased innovations by key industry players.

Smart Textile – A new trend

There has been an increasing trend of smart textiles in the market that use optical fibres, metals, and various conductive polymers to interact with the environment. These help in detecting and reacting to various physical stimuli, such as mechanical, thermal, chemical & electric sources. This is expected to propel the growth of the technical application segment in the market in the coming decade.

Indian Textile and Apparel: The textile sector of India is one of the oldest industries in the economy. It is also one of the most unique industries owing to its close linkage with the agricultural sector (for raw materials such as cotton) and the ancient traditions of the country. This sector can produce a variety of products suitable for different market segments within India and across the world.

Strong raw material base, years of ample experience, variety of local cultures, large and growing domestic market, stable, low-risk business backed by traditional methods and the efficient operating process has enhanced the labour strength of textile companies in India. Currently, textile companies in India employ over 6 crore people in the allied sectors, inclusive of women and the rural population and over 4.5 crore people in direct employment.

FY22 in retrospect: The year 2021 could be termed as a significant year for the Indian textile industry. During the year, the industry across the value chain has recovered quite well post the pandemic-related challenges. The last few years have been quite sluggish for the industry.

India's textile industry saw phenomenal sales and EBITDA growth in FY22 over pre-COVID levels, (As per the recent Wazir Textile Index compiled by Wazir Advisors for the year FY22). The index based on the analysis of 10 companies highlights, overall grew by 18% Y-o-Y since 2020.

India recorded its highest-ever textiles and apparel exports in the financial year 2021-22 at \$44.4 billion. The exports tally, which also includes handicrafts, indicates a substantial increase of 41% and 26% over corresponding figures in FY21 and

FY20, respectively. The US was the top export destination for the country's textile textiles and apparel shipments accounting for 27% share, followed by the European Union (18%), Bangladesh (12%) and UAE (6%)

Over the horizon: Covid-19 gave a golden opportunity for Indian textiles to stage a turnaround and regain a leadership position as a top exporting economy.

According to a report by the Confederation of Indian Industry (CII) and global consulting firm Kearney, India's textile exports, backed by the 'China Plus One' sentiment globally, are expected to grow by 81% to \$65 billion by 2026 from the pre-Covid level of around \$36 billion in 2019. This jump is likely to generate 7.5-10 million new jobs. This, coupled with growth in domestic consumption, could propel domestic production to reach \$160 billion.

Other key areas where the growth is expected to include fabrics where the target is a \$4 billion jump by positioning India as a regional fabric hub, starting with cotton wovens and then extending to other sub-categories.

In home textiles too, the target is an increase of \$4 billion by building on existing advantages to expand the global customer base. On man-made fibre and yarn, a \$2.5 billion to \$3 billion jump is expected with a focus on gaining share in MMF (manmade fibre) products.

On the other hand, in technical textiles around \$2 billion jump is targeted by building capabilities in select key sub-segments on the back of potential domestic demand growth.

Indian spinning sector: Spun yarn spinning industry is one of the few industries in India which has gained global eminence for many factors which include scale, productivity and quality standards, share in global yarn trade, dependable supplier of quality products, etc. India has the second largest spinning capacity but is the market leader in global yarn.

Indian spinning industry has also the unique capability of offering the entire range of yarns right from the coarsest count like 6s Ne to the finest count like 300s Ne both for domestic as well as export markets.

FY22 in retrospect: India's cotton yarn exports reached US\$5.21 billion in FY22 as compared to US\$2.71 billion in FY21, tapping 92.32% growth on yearly basis. Bangladesh topped the list as it accounted for 41.65% of total cotton yarn shipment from India. Valuing US\$2.17 billion, India's cotton yarn export to Bangladesh upped by a whopping 234.35% in FY22.

The inclusion of all cotton yarn exports under the Remission of Duties and Taxes on Exported Products (RoDTEP) scheme from January 2021 onwards (as notified in August 2021) has also supported margins as well as price competitiveness of domestic spinners in the international markets.

Moreover, the Indian spinning sector is looking to add huge capacity to meet global demand. As per an estimate, domestic spinning mills have been adding around 200,000 spindles every month in the last 6-8 months and the process is likely to continue in the coming months.

With the Indian textile industry expected to experience significant growth, the yarn sector, which is the backbone of the textile industry, will experience some of its better years over the medium term.

Indian Cotton Industry: India is one of the largest cotton-producing countries in the world, a dominant share in the global cotton trade. It has the distinction of having the largest area under cotton cultivation which is

about 37% of the world's area under cotton cultivation between 12.0 million hectares to 13.5 million hectares. The yield per kgs hectare which is presently 469 kgs/ha is still lower than the world average yield of about 787 Kgs /ha. (https://cotcorp.org.in/national_cotton.aspx?AspxAutoDetectCookieSupport=1)

Cotton season 2020-21: India's cotton production in 2020-21 (Oct-Sep) witnessed a drop to 353 lakh bales, compared to 365 lakh bales in the 2019-20 season. Central Zone – which includes Gujarat, Madhya Pradesh and Maharashtra – remains the highest cotton-producing zone.

Cotton season 2021-22: The Cotton Association of India estimated the cotton crop for the 2021-22 season at 362 lakh bales (of 170 kg each).

The total cotton supply for October 2021 to March 2022 is estimated at 344 lakh bales, which consists of the arrivals of 263 lakh bales, imports of 6 lakh bales and the opening stock estimated by the CAI at 73 lakh bales at the beginning of the season.

About the Company

Winsome Textiles Industry Limited (Winsome) is a yarn and knitted fabric manufacturing company with deep expertise in spinning melange yarn, a value-added yarn that has been in high demand.

Winsome, which started as business operations as a spinner of quality yarns has grown steadily from 16,000 spindles in the 1980s to 1,10,000 spindles. The Company also has a dye house with a capacity of 30 tonnes per day and a yarn-dyed fabric knitting unit with a capacity of 8 tonnes per day.

The Company's products are accepted by more than 250 customers across 50 countries and 600-plus customers within India.

Financial performance

Winsome reported a healthy performance in FY22. The Company reported good growth in its revenue from operations – it climbed to ₹955.53 crore in FY22 against ₹623.78 crore in FY21. This improvement was owing to the healthy traction of its products in the domestic market and its widening global footprint.

An increase in the proportion of value-added products and robust market dynamics leading to healthy product realisation assisted the Company in improving business profits and profitability. EBITDA improved from ₹59.68 crore in FY21 to ₹137.01 crore in

FY22. Profit for the year scaled to ₹ 45.62 crore in FY22 against ₹ (0.66) crore in FY21.

Profitability also improved a few notches higher. EBITDA margin improved by 481 bps to 14.34% in FY22 while Net margin stood at 4.77% in FY22 against 0.00% in FY21.

The Company ploughed business surplus which resulted in an increase in the Shareholders' Fund from ₹186.04 crore as on March 31, 2021, to ₹ 234.69 crore as on March 31, 2022. The book value per share moved up from ₹93.95 to ₹116.96 during the same period. Also, the Return on Equity improved from [0.65]% in FY21 to 19.62% in FY22

– owing to a handsome increase in the Net Profit.

The Net Cash flow from Operations stood at ₹26.05 crore in FY22 against ₹20.67 crore in FY21. The Company prudently utilised business liquidity to invest in business growth and deleverage the organisation. The debt-equity ratio (Net Debt/Equity) reduced to 2.42x as on March 31, 2022, against 2.90x as on March 31, 2021.

Current Assets stood at ₹487.70 crore as on March 31, 2022, against ₹418.23 crore as on March 31, 2021. This was due to an increase in inventories and receivables. The working capital cycle stood at 56days in FY22. .

Internal control systems and their adequacy

The Company's internal audit system has been continuously monitored and updated to ensure that assets are safeguarded, established regulations are complied with and pending issues are addressed promptly. The audit committee reviews reports presented by the internal auditors on a routine basis. The committee makes note of the audit observations and takes corrective actions, if necessary. It maintains a constant dialogue with statutory and internal auditors to ensure that internal control systems are operating effectively.

Human resources and industrial relations

Winsome recognises that its people are its greatest asset. It believes that a happy workforce is essential to imbibe excellence in work culture.

In FY22, the Company focused on standing by its people during the Covid second wave. A slew of measures was taken to ensure safety, and support for every employee. This strengthened the bond with its people to a new level.

During the year, the Company organised training programmes in different areas such as technical skills, behavioural skills, business excellence, general management, advanced management, leadership skills, customer orientation, safety, values and code of conduct.

Employees were sent for external training programs to CII, Ph.D. Chambers, NITRA, etc.

The Company continued with its TQM and Quality Circles. In addition to problem-solving, these globally-accepted tools helped in team bonding and motivation.

Art of Living workshops was conducted to cover staff and workers, which led to self-development, spiritual enlightenment and enhanced happiness quotient.

The Company is engaged as a Training Provider with National Skill Development Corporation under Registration number 9187 for the following:

- Pradhan Mantri Kaushal Vikas Yojna for providing training to new/fresh apprentices
- Recognised Prior Learning at two centers at Baddi (under the Textile Sector Skill Council) for ring frame tenter, ring frame doffer and auto-coner tenter.

The Company had a people strength of 2,430 employees as on March 31, 2022.

Risks and concerns

Risk, which is the manifestation of business uncertainty affecting corporate performance and prospects, is an integral part of the business. The Company follows a well-defined and exhaustive risk management process, which is integrated with its operations. This enables the Company to identify, categorise and prioritise operational, financial and strategic business risks. To address the identified risks, the Company continues to spend significant time, effort and human resources to manage and mitigate such risks.

PERFORMANCE REVIEW/STATE OF AFFAIRS OF THE COMPANY

A. Yarn Spinning, Dyeing and Fabric

During the year under review, your Company has achieved an increase in Sales by 53.60% to ₹95817.59 Lacs against ₹62378.39 Lacs during the previous year and net profit (after tax) has increased by 38 times to ₹4548.65 Lacs for the current year against net loss (after tax) of ₹(121.37) Lacs in the previous year. Further the exports of the company during the year increased by 113% to ₹59926.68 Lacs against ₹28119.38 Lacs for the previous financial year.

B. Hydro Power Project of Company

The Company's Manuni Hydro Electric Power Project (3.5 M.W.) at Dharamshala, Distt. Kangra, Manuni Khad (H.P.) has been synchronized with H.P.S.E.B.L. Grid on 31.03.2017. Further, during the year under review Manuni Hydro Electric Project has generated about 121 Lacs units against 111 Lacs units in the previous year.

During the year under review, working of company vastly improved due to easing of Covid-19 restrictions and resumption of purchase by consumer. Cotton as well as yarn prices shot up due to which both sales as well as profitability of company improved. Availability of labour which was one of the major concern during Covid-19 surge period, was no longer an issue during period under review resulting in better utilization and higher production. Since inventory levels in overseas garment stores were at its lowest level during previous years, export sales showed significant growth touching almost ₹600 Crores as compared to last year figure of ₹281.19 Crores. Furthermore, preference of sourcing from suppliers other than China which started last year picked up momentum, which is still continuing and we expect textile industry as a whole would continue to perform better for next few years. To meet the ever increasing demand of value added yarn, company is planning modernization and upgradation of its manufacturing facilities which would help in further increase in quality of products with increased production and utilization. Further, as COVID-19 pandemic had severe financial and operational impact on the company resulting in weakening of Company's working capital and adversely impacting its profitability, So during the year under review, company has restructured its credit facilities under RBI resolution framework for COVID-19 related stress.

ACCOLADES AND RECOGNITIONS

We are very pleased to inform you that our company has been awarded the "Gold" award for highest exports of "Processed yarns" from India for the FY 2020-21 in Category-II (₹75 Crores - ₹250 Crores) by The Cotton Textile Export Promotion Council (TEXPROCIL). Now overall in India Winsome is at No.2 in exports of Processed yarns.

MODERNISATION & EXPANSION

During the year under review, the Company has taken several progressive steps for modernization of existing machineries which includes, new preparatory for Unit-1 and replaced some old carding machines to enhance production, reduce downtime and better utilization of resources. Further new material handling equipment's, new lab equipment and stretch wrapping machine was also installed.

Furthermore, to contribute towards environment, the Company has also installed new state of art Effluent Treatment Plant (ETP) at Unit -1 with a cost of ₹15 Crores approx.

SHARE CAPITAL

The Authorized Capital of the Company was reclassified during the year from ₹25,00,00,000/- (Rupees Twenty Five Crores) divided into 5000 (Five Thousand) Redeemable Cumulative Preference Shares of ₹100/- each and 2,49,50,000 (Two Crore Forty Nine Lac Fifty Thousand) Equity Shares of ₹10/- each to ₹25,00,00,000/- (Rupees Twenty Five Crores) divided into 2,50,00,000 (Two Crore Fifty Lac) Equity Shares of ₹10/- each.

Independent Auditor's Report

To the Members of Winsome Textile Industries Limited

Report on the Financial Statements

Opinion

We have audited the accompanying financial statements of **M/s Winsome Textile Industries Limited** ('the Company'), which comprise the Balance Sheet as at 31 March 2022, the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and Statement of Cash Flow for the year then ended, and Notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Indian Accounting Standards ('Ind AS') specified under section 133 of the Act, of the state of affairs (financial position) of the Company as at March 31, 2022, and Profit (financial performance including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of

Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the Ind AS financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the Ind AS financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying Ind AS financial statements.

Key Audit Matter	How the matter was addressed in our audit
<p>Inventories held by the Company comprising of Raw Material, Work-in-Progress, Finished Goods and Others represents 32.41% of the Company's total assets.</p> <p>Under Ind AS, the Company is required to measure inventory at lower of Cost or Net Realizable Value (NRV). However the raw material and work-in progress is not written down below cost when finished goods are expected to be sold at or above cost.</p>	<p>Our audit procedures included:</p> <ul style="list-style-type: none"> Through discussions with management, we understood the Company's basis of estimated selling price for the goods; Evaluating the design & testing controls related to Company's review of key estimates, including estimated future selling prices and estimated cost of completion for work-in-progress inventory.
<p>Assessing NRV</p> <p>Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.</p> <p>The assessment and application of write-down of inventory to NRV are subject to significant judgement by Company.</p>	<p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> We tested the design and operative effectiveness of management's key internal controls over allowance for credit losses. We assessed the completeness and accuracy of the information used in the estimation of probability of default and tested

Considering the company's present situation, significant judgements made by the company in light of future market & economic conditions for determination of NRV and considering materiality in context of total assets of the Company, we have considered the valuation of inventory to be the key audit matter.

As at March 31, 2022, the Company has outstanding trade receivables of ₹15,540.51 Lakhs. The Company has determined the provision for credit losses based on the ageing status and historical loss experience adjusted to reflect current and estimated future economic conditions.

We considered this as key audit matter due to the materiality of the amounts and significant estimates and judgements as stated above.

historical payment records, correspondence with customers, credit related information and subsequent collection of the customers' balances.

- We assessed the allowance for expected credit loss made by management and performed analysis of ageing of receivables, tested the mathematical accuracy and computation of the allowance for credit losses.

Information other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs (financial position), profit or loss (financial performance including other comprehensive income), changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India including the Ind AS specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has internal financial controls with reference to Financial Statements in place and the operating effectiveness of such controls

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms

of sub-section (11) of section 143 of the Act, we give in the **Annexure A**, a statement on the matters specified in the paragraph 3 and 4 of the order.

Annexure - B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Winsome Textile Industries Limited** ("the Company") as of 31 March 2022 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS

1. CORPORATE INFORMATION

Winsome Textile Industries Limited ("the Company") is a public limited company domiciled and incorporated under the provisions of the Companies Act, 1956 on 18th September, 1980 in India and its shares are publicly traded on the Bombay Stock Exchange ("BSE"), India. The Registered Office of the company is situated at 1 Industrial Area, Baddi, Solan, Himachal Pradesh – 173205 India and the Corporate office is situated at SCO # 191 - 192, Sector # 34-A, Chandigarh, 160022.

The principal business activity of the company is manufacturing of Cotton Yarn, Cotton Melange, Cotton Blended Dyed Yarn/Fibre, Yarn made of natural and manmade fibre and other fibres, Knitted Fabric and Power generation in Textile Sector.

The financial statements were authorised for issue in accordance with a resolution passed by the Board of Directors on 16th May, 2022.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of preparation of financial Statements

The financial statements of the Company have been prepared on accrual basis in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and the provisions of the Companies Act, 2013.

These financial statements for the year ended 31st March 2022 have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and the provisions of the Companies Act, 2013.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities which have been measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in Indian Rupees ("INR" or "₹") and all amounts are rounded to the nearest Lacs, except as stated otherwise.

2.2 Estimates and Judgements

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions effect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed in note 2.23. Accounting estimates could change from period to period.

Actual results may differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

2.3 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.4 Property, Plant and Equipment

The Company had applied one-time transition exemption of considering the carrying cost on the transition date i.e. 1st April, 2016 as the deemed cost under IND AS and hence regarded thereafter as historical cost.

Leased hold Land is carried at cost less reduction in proportionate annual Lease Rental.

Freehold land and Capital Work in progress is carried at cost. All other items of Property, plant and equipment are stated at cost, less accumulated depreciation. The Cost of an item of Property, Plant and Equipment comprises of:

- (a) its purchase price including freight, duties, and non-refundable purchase taxes after deducting trade discounts and rebates;
- (b) any attributable expenditure directly attributable for

NOTES TO THE FINANCIAL STATEMENTS

bringing an asset to the location and the working condition for its intended use; and

- (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which the company incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives. Depreciation on addition/sale is provided on Pro-rata basis with reference to the month of addition/sale. The useful lives estimated for the major classes of property, plant and equipment are as follows:

Class of property, plant and equipment	Useful life (in years)
Buildings	3-60
Plant & Machinery	3-25
Furniture & Fixtures	5-10
Vehicles	8-10
R&D Assets	5-25
Equipments and facilities	3-5
Computer & Networks	3-6

The useful lives have been determined based on technical evaluation done by the management's experts, which in few cases are different than the lives as specified by Schedule II to the Companies Act, 2013. The residual values are not more than 5% of the original cost of the asset except in case of plant & machinery where the residual values are not more than 10% of the original cost of the asset. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'.

Subsequent expenditures relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs and maintenance costs are recognized in net profit in the statement of profit and loss when incurred. The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the statement of profit and loss. Assets to be disposed off are reported at the lower of the carrying value or the fair value less cost to sell.

2.5 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment loss.

On transition to Ind AS, the company had elected to continue with the carrying value of all its intangible assets recognised as at 1st April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised on a straight-line method over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset are reviewed at least at the end of each reporting period and adjusted, if appropriate. The useful economic lives estimated for various classes of intangible assets are as follows:

Class of intangible assets	Useful life (in years)
Software	6

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually.

2.6 Inventories

Inventories are valued at cost or net realizable value, whichever is lower except waste which is valued at net realisable value. The cost in respect of the various items of inventory is computed as under:

Raw Materials - At weighted average cost plus direct expenses. The cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. However, materials and other items held for use in the production of inventories are not written down below cost if the finished product in which they will be incorporated are expected to be sold at or above cost.

Stores and Spares - At weighted average cost plus direct expenses. The cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.

Work-in-Progress - At raw material cost plus conversion costs depending upon the stage of completion and other related overhead costs.

Finished Goods - At raw material cost plus conversion costs, packing cost and other overheads incurred to bring the goods to their present location and condition.

NOTES TO THE FINANCIAL STATEMENTS

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.7 Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with a maturity period of twelve months or less from the balance sheet date, which are subject to an insignificant risk of changes in value and is freely available for the company. Bank overdrafts are shown under borrowings in the balance sheet.

Earmarked bank balances and/or short-term deposits which are lien marked against borrowings are shown under the head "Bank balances other than Cash and Cash Equivalent".

2.8 Financial instruments

A. Financial Instruments - Initial recognition and measurement

Financial assets and financial liabilities are recognised in the company's statement of financial position when the company becomes a party to the contractual provisions of the instrument. The company determines the classification of its financial assets and liabilities at initial recognition. All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Transaction costs of financial assets and liabilities carried at fair value through the Profit and Loss are immediately recognized in the Statement of Profit and Loss.

B.1. Financial assets –Subsequent measurement

The Subsequent measurement of financial assets depends on their classification which is as follows:

a. Financial assets at fair value through profit or loss

Financial assets at fair value through profit and loss include financial assets held for sale in the near term and those designated upon initial recognition at fair value through profit or loss.

b. Financial assets measured at amortised cost

Loans and receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowance for estimated irrecoverable amounts based on the ageing of the receivables balance and historical experience. Additionally, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. Individual trade receivables are written off when management deems them not to be collectible.

c. Financial assets at fair value through OCI

All equity investments, except investments in subsidiaries, joint ventures and associates, falling within the scope of Ind AS 109, are measured at fair value through Other Comprehensive Income (OCI). The company makes an irrevocable election on an instrument-by-instrument basis to present in other comprehensive income subsequent changes in the fair value. The classification is made on initial recognition and is irrevocable.

If the company decides to designate an equity instrument at fair value through OCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI.

B.2. Financial assets –De-recognition

The company derecognises a financial asset when the contractual rights to the cash flows from the assets expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset.

Upon de-recognition of equity instruments designated at fair value through OCI, the associated fair value changes of that equity instrument are transferred from OCI to Retained Earnings.

C.1. Financial liabilities –Subsequent measurement

The Subsequent measurement of financial liabilities depends on their classification which is as follows:

a. Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading, if any.

b. Financial liabilities measured at amortised cost

Interest bearing loans and borrowings of the company are subsequently measured at amortised cost using the effective interest rate method (EIR). Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are integral part of the EIR. The EIR amortised is included in finance costs in the statement of profit and loss.

C.2. Financial liabilities –De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or expires.

D. Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position, if and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle

NOTES TO THE FINANCIAL STATEMENTS

on a net basis, or to realise the assets and settle the liabilities simultaneously.

E. Derivative financial instruments

The Company holds derivative financial instruments such as foreign exchange forward and option contracts to mitigate the risk of changes in exchange rates on foreign currency exposures. The counterparty for these contracts is generally a bank. Although the Company believes that these derivatives constitute hedges from an economic perspective, they may not qualify for hedge accounting under Ind AS 109, Financial Instruments. Any derivative that is either not designated a hedge, or is so designated but is ineffective as per Ind AS 109, is categorized as a financial asset or financial liability, at fair value through profit or loss. Derivatives not designated as hedges are recognized initially at fair value and attributable transaction costs are recognized in net profit in the statement of profit and loss when incurred. Subsequent to initial recognition, these derivatives are measured at fair value through profit or loss and the resulting exchange gains or losses are included in Exchange Rate Variation Gain. Assets/ liabilities in this category are presented as current assets/current liabilities if they are either held for trading or are expected to be realized within 12 months after the balance sheet date.

F. Fair value measurement

The company measures certain financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the assets or liability or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the company.

The company uses valuation technique that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

2.9 Government Grants

The government grants are recognized only when there is reasonable assurance that the conditions attached to them shall be complied with, and the grants will be received. Government grants related to assets are treated as deferred income and are recognized in the statement of profit and loss on a systematic and rational basis over the useful life of the asset.

Government grants related to revenue are recognized on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs which they are intended to compensate.

2.10 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell.

Non-current assets classified as held for sale and their related liabilities are presented separately in the balance sheet. Non-current assets are not depreciated or amortised while they are classified as held for sale.

2.11 Provisions, Contingent Liabilities and Contingent Assets

A provision shall be recognised when:

- (a) an entity has a present obligation as a result of a past event;
- (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- (c) a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

A Contingent liability is not recognised but disclosed in the notes to the accounts, unless the probability of an outflow of resources is remote.

A contingent asset is generally neither recognised nor disclosed.

2.12 Revenue Recognition

Effective April 1, 2018, the company adopted Ind AS 115, "Revenue from contracts with customers". The effect of adoption of Ind AS 115 was insignificant. The following is a summary of significant accounting policies related to revenue recognition.

Revenue is recognised upon transfer of control of promised product or services to customer in an amount that reflects the consideration the company expects to receive in exchange for those product or service, regardless of when the payment is received. Revenue is measured at the Transaction price, excluding amounts collected on behalf of the third parties.

NOTES TO THE FINANCIAL STATEMENTS

The amount disclosed as revenue is net of returns, trade discounts, volume rebates, Goods and Services Tax. The company recognizes revenue when the amount of revenue can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the entity.

The specific recognition criteria for the various types of the company's activities are described below:

(i) Sales of goods

Revenue from sale of goods is recognised at the point in time when control of the goods are transferred to the customers, the customer has full discretion over the channel and price to sell the products, there is no unfulfilled obligation that could affect the customer's acceptance of the products and the company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold. The said conditions are generally fulfilled upon delivery of goods to the customers.

Delivery occurs when the goods have been shipped to the specific location, the risks and rewards of obsolescence and loss have been transferred to the customer, and either the customer has accepted the goods in accordance with the sale contract, the acceptance provisions have lapsed, or the company has objective evidence that all criteria for acceptance have been satisfied.

(ii) Services

Revenue from sale of services is recognised on the basis of the stage of completion. When the contract outcome cannot be measured reliably, revenue is recognised only to the extent that the expenses incurred are eligible to be recovered.

(iii) Export Incentives

Revenue in respect of the export incentives other than RoDTEP incentives are recognized on accrual basis in the period in which the related exports have been made.

Revenue in respect of the RoDTEP export incentives are recognized in the period in which the related exports have been made based at an estimated value based on historical realisations, taking into consideration the type of transaction and the specifics of each arrangement.

(iv) Power Generation

Sale of power is recognised on the basis of meter reading confirmed by buyers in accordance with the respective agreement.

Renewable Energy Certificate are accounted for on certification of energy sale quantity by the buyer and is

valued at minimum sale price fixed by Central Electricity Regulatory Authority after adjusting expected outgo.

(v) Interest

Income from interest is recognized using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses.

(vi) Dividend

Dividend income is recognized when the right to receive the payment is established.

(vii) Insurance and other claims are recognized when no significant uncertainty exists with regard to ultimate collection thereof, and same is adjusted from corresponding heads of expense.

2.13 Employees Benefits

(i) Short term Employee Benefits:

Liabilities for wages, salaries and other employee benefits that are expected to be settled within twelve months of rendering the service by the employees are classified as short term employee benefits. Such short term employee benefits are measured at the amounts expected to be paid when the liabilities are settled. Short Term Employee Benefits are recognized as an expense on an undiscounted basis in the statement of profit and loss of the year in which the related service is rendered.

(ii) Post Employment Benefits

(a) Defined Contribution Plans:

Provident Fund

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

(b) Defined Benefit Plans

Gratuity

The Company provides for gratuity, a defined benefit retirement plan ('the Gratuity Plan') covering eligible employees of the Company. The Gratuity Plan provides a lump-sum payment to vested employees at retirement,

NOTES TO THE FINANCIAL STATEMENTS

death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with the Company. Liabilities with regard to the Gratuity Plan are determined by actuarial valuation, performed by an independent actuary, at each balance sheet date using the projected unit credit method.

The Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Re-measurements comprising of actuarial gains and losses, the effect of the asset ceiling (excluding amounts included in net interest on the net defined benefit liability) and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability) are recognised in Other Comprehensive Income which are not reclassified to profit or loss in subsequent periods.

(iii) Long-term employee benefits

The liability of accumulating compensated absences is determined by actuarial valuation performed by an independent actuary at each balance sheet date using Projected Unit Credit Method.

2.14 Borrowing Costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of the asset. Other borrowing costs are recognized as an expense in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

2.15 Foreign Currency Transactions

The foreign currency transactions are recorded, on initial recognition in the functional currency (i.e. Indian Rupee), by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. The foreign currency monetary items are translated using the closing rate at the end of each reporting period. Non-monetary items that are measured in terms of historical cost in a foreign currency shall be translated using the exchange rate at the date of the transaction. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognised in profit or loss in the period in which they arise.

Foreign exchange differences recorded as an adjustment to borrowing costs are presented in the statement of profit and

loss, as a part of finance cost. All other foreign exchange gains and losses are presented in the statement of profit and loss on net basis.

In respect of foreign branch, which is in the nature of integral foreign operations, all transactions are translated using the exchange rate at the date of the transaction. The translation of monetary assets and liabilities is performed using the exchange rate in effect at the balance sheet date. Fixed assets are translated as at the date of transaction. Depreciation is translated at the rates applied for translation of fixed assets.

2.16 Leases

Effective from April 1, 2019 the company adopted Ind AS 116, "Leases". The effect of adoption of Ind AS 116 was insignificant. The following is a summary of significant accounting policies related to Leases.

A. Company as a Lessee

The Company assesses whether a contract contains a lease at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

The company applies a single recognition and measurement approach for all leases, except for leasehold land, short-term leases and leases of low-value. For short-term and leases of low value, the Company recognises the lease payments as an operating expense on a straight line basis over the term of the lease.

Leasehold land is carried at the acquisition cost i.e. one-time lease premium paid at the time of acquisition of leasehold rights. However, if there is no reasonable certainty that the company will obtain ownership by the end of the lease term, the asset is amortized over the shorter of the estimated useful life of the asset and the lease term. For all other leases, the Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

NOTES TO THE FINANCIAL STATEMENTS

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the incremental borrowing rate at the lease commencement date. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

Right-of-use assets are included in the Leased Assets and lease liabilities are included in other current and non-current financial liabilities in the balance sheet. Lease payments have been classified as financing cash flows in the Statement of Profit and Loss.

B. Company as a Lessor

Leases for which the company is a lessor is classified as finance or operating leases. Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease term, unless the receipts are structured to increase in line with expected general inflation.

2.17 Income Taxes

Income tax expense comprises current tax and deferred tax. Income tax expense is recognized in net profit in the statement of profit and loss except to the extent that it relates to items recognized directly in equity or other comprehensive income, in which case it is also recognized in equity or other comprehensive income respectively.

Current Taxes:

Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred Taxes:

Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date except when the deferred income tax arises from the initial recognition of

an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction. Deferred tax assets and liabilities are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Minimum Alternate Tax credit is recognised as a tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

2.18 Impairment of assets

a) Financial assets

The company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is recognized as an impairment gain or loss in statement of profit or loss.

b) Non-financial assets

Intangible assets and property, plant and equipment are

NOTES TO THE FINANCIAL STATEMENTS

evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit to which the asset belongs. If such assets are considered to be impaired, the impairment to be recognized in the statement of profit and loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

2.19 Earnings per Share

The Basic earnings per share (EPS) is calculated by dividing the net profit or loss for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year.

Diluted earnings per equity share is calculated by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

2.20 Dividends

Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the company's Board of Directors.

2.21 Cash flow statement

The cash flow statement is prepared in accordance with the Indian Accounting Standard (Ind AS) - 7 "Statement of Cash flows" using the indirect method for operating activities.

2.22 Exceptional items

Exceptional items refer to items of income or expense within statement of profit and loss from ordinary activities which are non-recurring and are of such size, nature or incidence that their separate disclosure is considered necessary to explain the performance of the company.

2.23 Critical accounting estimates

Property, plant and equipment

Property, plant and equipment represent a significant proportion of the asset base of the Company. The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The useful lives and residual values of company's assets are determined by management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

Intangible assets

The company tests whether intangible assets have suffered any impairment on an annual basis. The recoverable amount of a cash generating unit is determined based on value in use calculations which require the use of assumptions.

Trade Receivables

As per Ind AS 109, the company is required to apply expected credit losses model for recognising the provision for doubtful debts. The expected credit losses are determined based on past trends and assumptions.

Employee Benefits

The Union Ministry of Labour issued draft rules under section 67 of the Code on Wages Act in July, 2020 in the Gazette and the Act is yet to be effective. The three labour codes, the Occupational Health, Safety and Working Conditions Code 2020, the Industrial Relations Code 2020 and the Code on Social Security, 2020 have been passed by the parliament and have also received the assent of the President of India on September, 2020. However, the date on which these Codes will come into effect has not been notified. The Company will assess the impact of these Codes and will record any related impact in the period these Codes become effective.

Management estimations and assumptions

- a) The management assessed that cash and cash equivalents, trade receivables, trade payables, bank overdrafts and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.
- b) The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:
 - (i) The fair values of the unquoted equity shares have been determined based on certifications from valuers who have used Net Asset Value approach for determining the fair values.
 - (ii) The fair values of the derivative financial instruments have been determined based on the exchange rates prevailing as at year end.

11.2 Fair Value Measurement**(i) Fair Value hierarchy**

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The company's policy is to recognize transfers into and the transfers out of fair value hierarchy levels as at the end of the reporting period. There are no transfers between level 1 and level 2 during the end of the reported periods.

(ii) The following table presents fair value hierarchy of assets and liabilities measured at fair value:**As at 31st March 2022**

11.3 Financial Risk Management

The principal financial assets of the Company include loans, trade and other receivables, and cash and bank balances that derive directly from its operations. The principal financial liabilities of the company, include loans and borrowings, trade and other payables and the main purpose of these financial liabilities is to finance the day to day operations of the company.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks and that advises on financial risks and the appropriate financial risk governance framework for the Company.

This note explains the risks which the company is exposed to and policies and framework adopted by the company to manage these risks:

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprise three types of risk: foreign currency risk, interest rate risk, investment risk.

(i) Foreign currency risk

The company operates internationally and business is transacted in several currencies.

The export sales of company included in the total sales of the company, Further the company also imports certain assets and material from outside India. The exchange rate between the Indian rupee and foreign currencies has changed substantially in recent years and may fluctuate substantially in the future. Consequently the company is exposed to foreign currency risk and the results of the company may be affected as the rupee appreciates/ depreciates against foreign currencies. Foreign exchange risk arises from the future probable transactions and recognized assets and liabilities denominated in a currency other than company's functional currency.

The company measures the risk through a forecast of highly probable foreign currency cash flows and manages its foreign currency risk by appropriately hedging the transactions. The Company uses a combination of derivative financial instruments such as foreign exchange forward and option contracts to mitigate the risk of changes in exchange rates on foreign currency exposures.

(a) The following table summarizes the company's exposure to foreign currency risk from financial instruments at the end of each reporting period:

(ii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates.

The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates, which are included in interest bearing loans and borrowings in these financial statements. The company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

At the reporting date the interest rate profile of the Company's interest bearing financial instrument is at its fair value:

Particulars	As at 31 st March, 2022	As at 31 st March, 2021
Variable rate instruments		
Long term borrowings	18,016.39	7,863.50
Current maturities of long term debt	2,741.01	4,598.32
Short term borrowings	12,626.30	19,256.02

(iii) Credit Risk'

Credit risk refers to the risk of default on its obligation by the counterparty resulting in a financial loss. The maximum exposure to the credit risk at the reporting date is primarily from trade receivables which are typically unsecured. Credit risk on cash and bank balances is limited as the company generally invests in deposits with banks and financial institutions with high credit ratings assigned by credit rating agencies. The Company's credit risk in case of all other financial instruments is negligible.

The company assesses the credit risk based on external credit ratings assigned by credit rating agencies. The company also assesses the creditworthiness of the customers internally to whom goods are sold on credit terms in the normal course of business. The credit limit of each customer is defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any shipments to overseas customers are generally covered by letters of credit.

The impairment analysis is performed on client to client basis for the debtors that are past due at the end of each reporting date. The

NOTES TO THE FINANCIAL STATEMENTS**(₹ in Lacs)**

company has not considered an allowance for doubtful debts in case of trade receivables that are past due but there has not been a significant change in the credit quality and the amounts are still considered recoverable.

Write off policy

The financial assets are written off in case there is no reasonable expectation of recovering from the financial asset.

NOTES TO THE FINANCIAL STATEMENTS**(₹ in Lacs)****32. CAPITAL MANAGEMENT**

The capital includes issued equity capital, share premium and all other equity reserves attributable to the equity holders of the company. The primary objective of the company's capital management is to maintain optimum capital structure to reduce cost of capital and to maximize the shareholder value.

The company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants which otherwise would permit the banks to immediately call loans and borrowings. In order to maintain or adjust the capital structure, the company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company's gearing ratio was as follows:

Particulars	As at 31 st March, 2022	As at 31 st March, 2021
Borrowings	33,383.70	31,717.84
Less: Cash and cash equivalents	2,679.11	1,549.33
Net debt	30,704.59	30,168.51
Total equity	23,181.53	18,619.56
Capital and Net debt	53,886.12	48,788.07
Gearing ratio	56.98%	61.84%

Further, there have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year ended 31st March 2022.

There were no changes in the objectives, policies or processes for managing capital during the year ended 31 March 2022 and 31 March 2021.

33. The Code on Social Security, 2020 ('Code') relating to employee benefits during employment and post-employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified and the final rules/interpretation have not yet been issued. The Company is in the process of assessing the impact of the code and will record the same, if any, in the year the Code becomes effective.

NOTES TO THE FINANCIAL STATEMENTS**(₹ in Lacs)**

(*) Earnings available for debts service	=	Profit after Tax before depreciation and interest on long term borrowings
(**) Debts Service	=	Repayment of long term borrowings and Gross Interest on long term borrowings
(†) Capital Employed	=	Total book value of all assets less current liabilities

Reason of variance where the variance exceeds 25% as compared to previous years:

Covid -19 pandemic had severe financial and operational impact on the company, resulting in weakening of the company's working capital, adversely impacting its revenue and profitability during the last previous year due to this there is substantial gap arises in above mentioned ratios between current year and previous year.

(a) Current Ratio	During the current financial year, short term borrowings have been reduced from ₹220 Crores to ₹121.08 Crores (sanctioned amount) as per restructuring plan implemented by banks and efficient working capital management, as compare to previous financial year, led to improvement in Net Working Capital.
(b) Return on Equity Ratio, Net capital turnover Ratio, Net Profit Ratio & Return on Capital employed	The company achieved higher Turnover and Net Profits in Financial Year. 2021-22 against Net Loss in Financial Year 2020-21.
(c) Trade Payable Turnover Ratio (No. of days)	The company achieved higher cash profit in Financial Year 2021-22 as compared to Financial Year 2020-21 resulting in early payment to Trade Payable in Financial Year 2021-22 as compared to Financial Year 2020-21.
